## Welcome “Wimsym77”

A workshop in honour of Wim Brouw: celebrating & reflecting  
on his many outstanding contributions to radio astronomy

6 – 7 July 2017

Prof Carole Jackson  
General & Scientific Director, ASTRON

---

1kT Workshop -- Sydney -- 15-18 **December 1997**

The *earliest* SKA related meeting in the SKA.org organisation meetings archive

The 2nd 1kT workshop  
– Wim as the key driver/strategy

<http://www.atnf.csiro.au/research/conferences/SKA1997/wswnb/index.html>

**Sydney -- 15-18 December 1997**

The major conclusions of the second 1kT Technical Workshop (by Wim)

- Worldwide cooperation is necessary in view of: the cost of the facility
- estimates in the order of 600 M\$ seem appropriate)
- the extensive range of scientific goals, which can only be met in a general and versatile instrument

The complexity of the technology and the software means that worldwide knowledge must be applied to the design and implementation of the instrument.
