AA consortium meeting 30 - 31 May, 2013

"Reinventing Radio-Astronomy: Technologies that made a Difference"

Rationale

Arnold van Ardenne will retire in the spring of 2013. To mark his 65th birthday ASTRON organizes a one day symposium "Reinventing Radio-Astronomy: Technologies that made a Difference" on May 29th, 2013.

Olson 1957

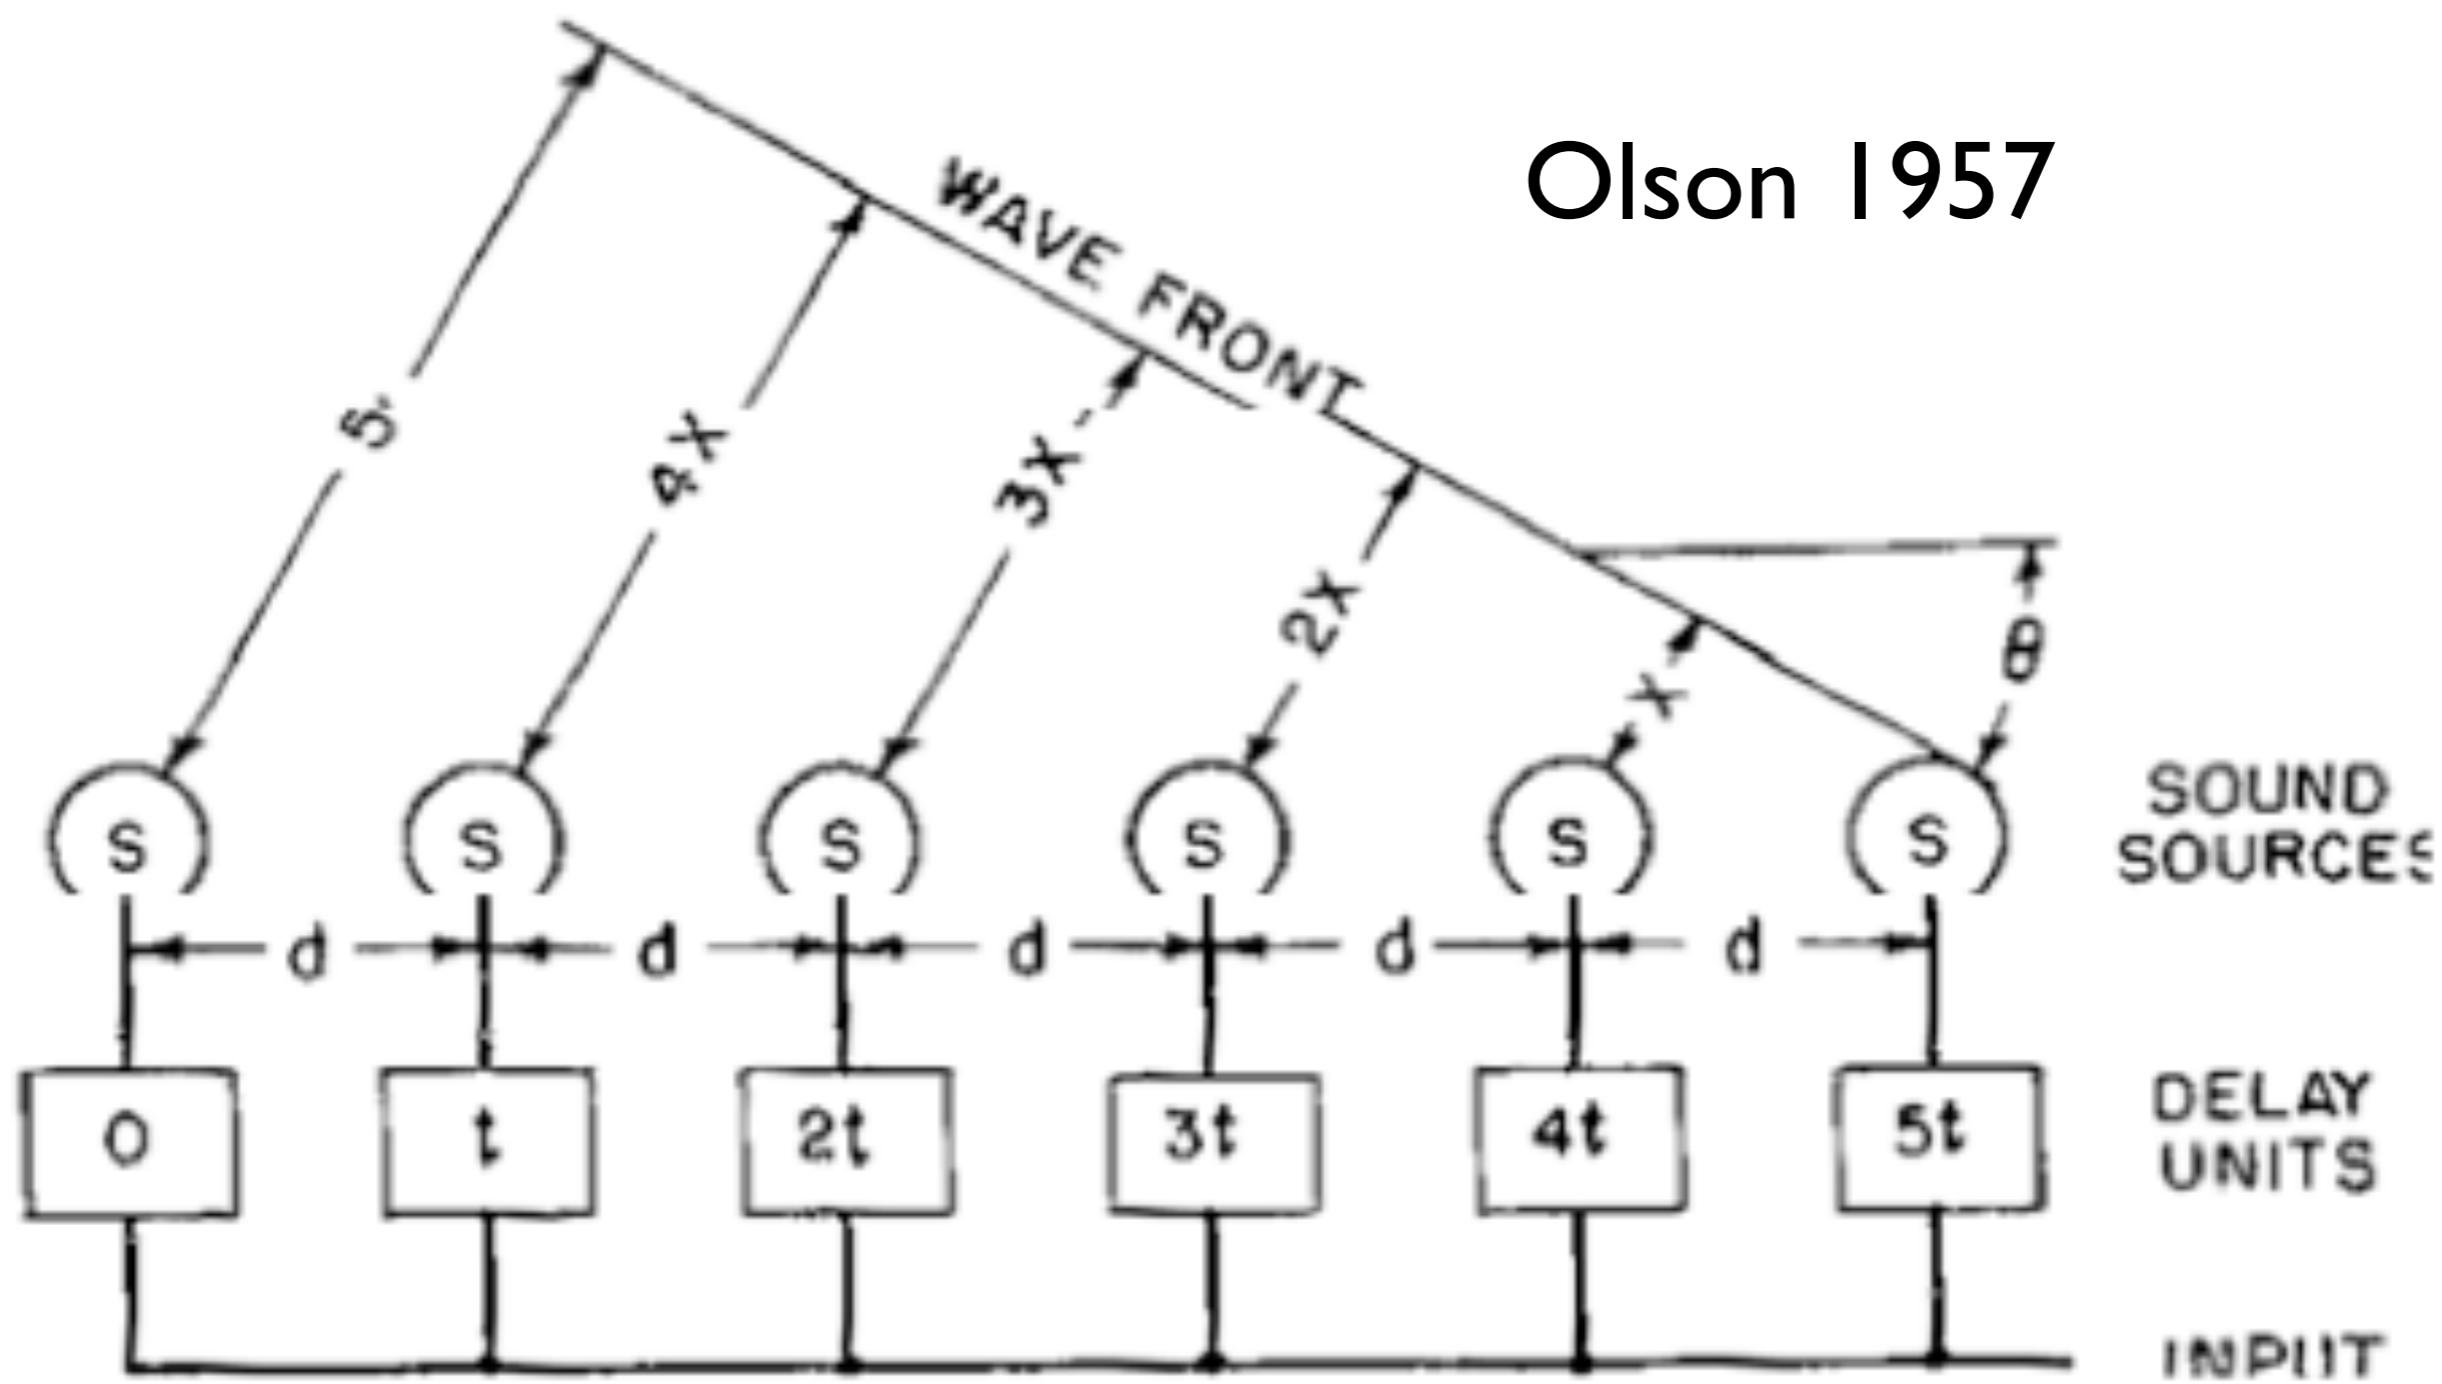

FIG. 2.5. A delay system for tilting the directional characteristic of a line of sound sources

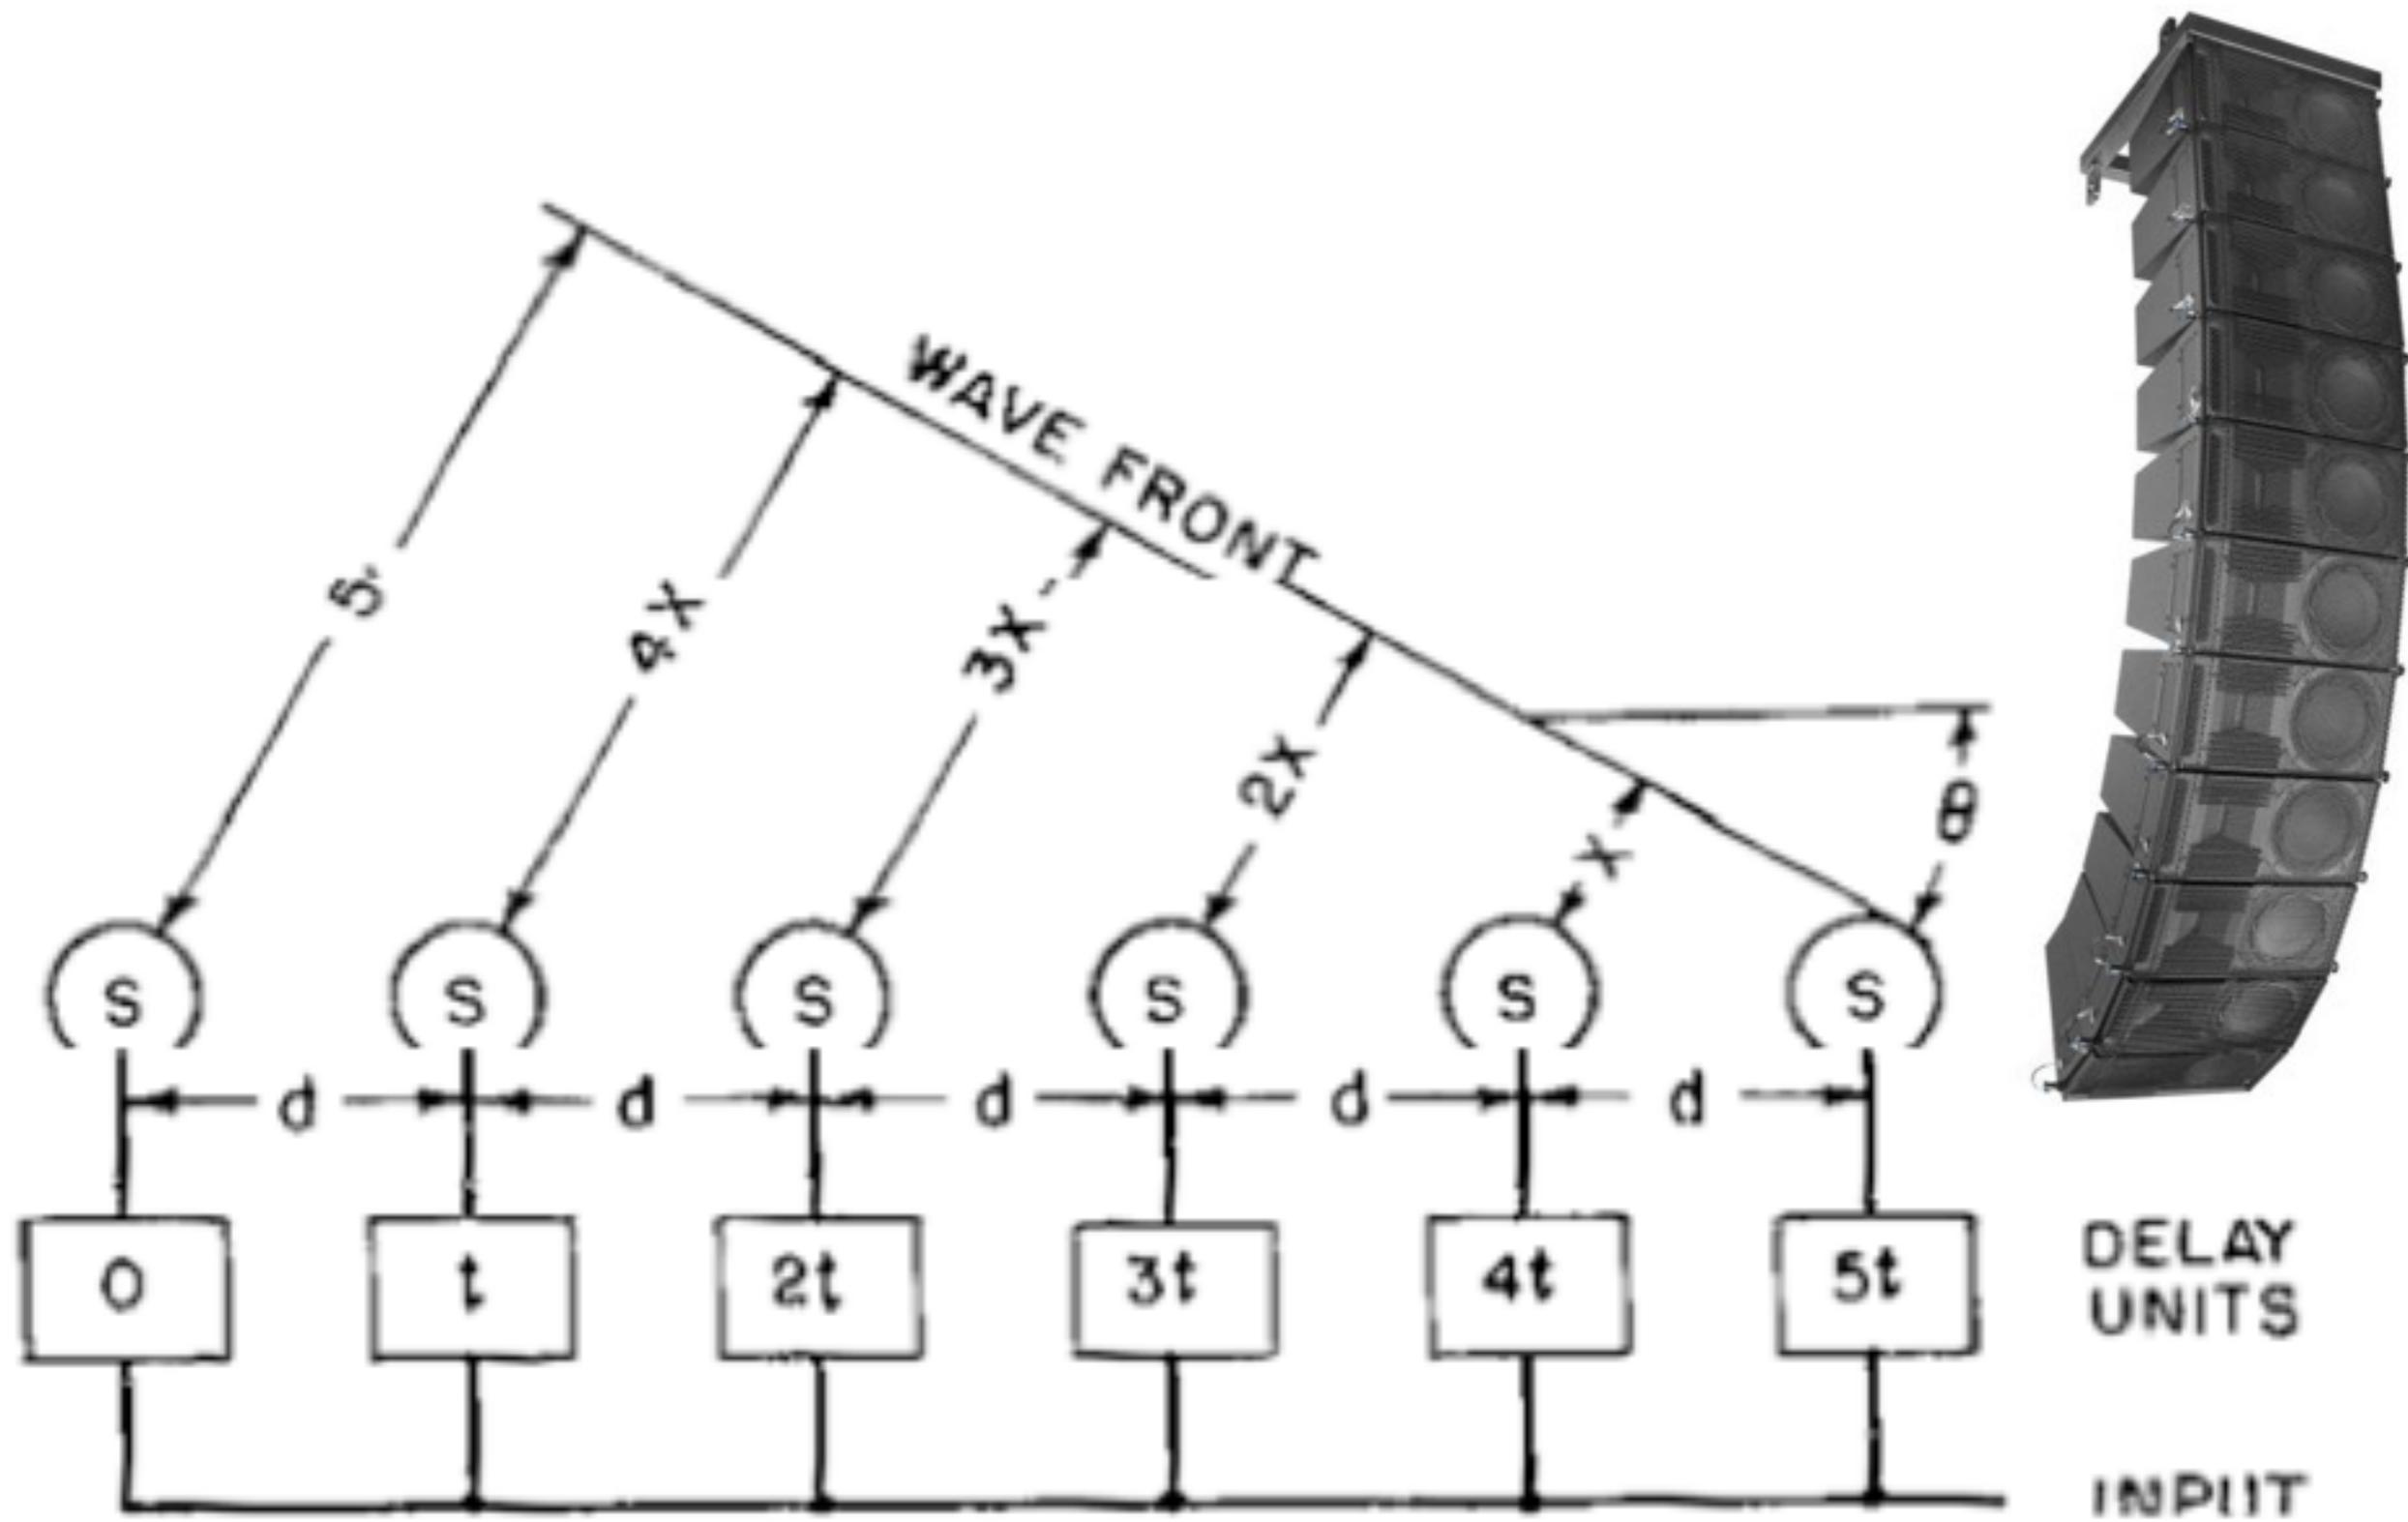

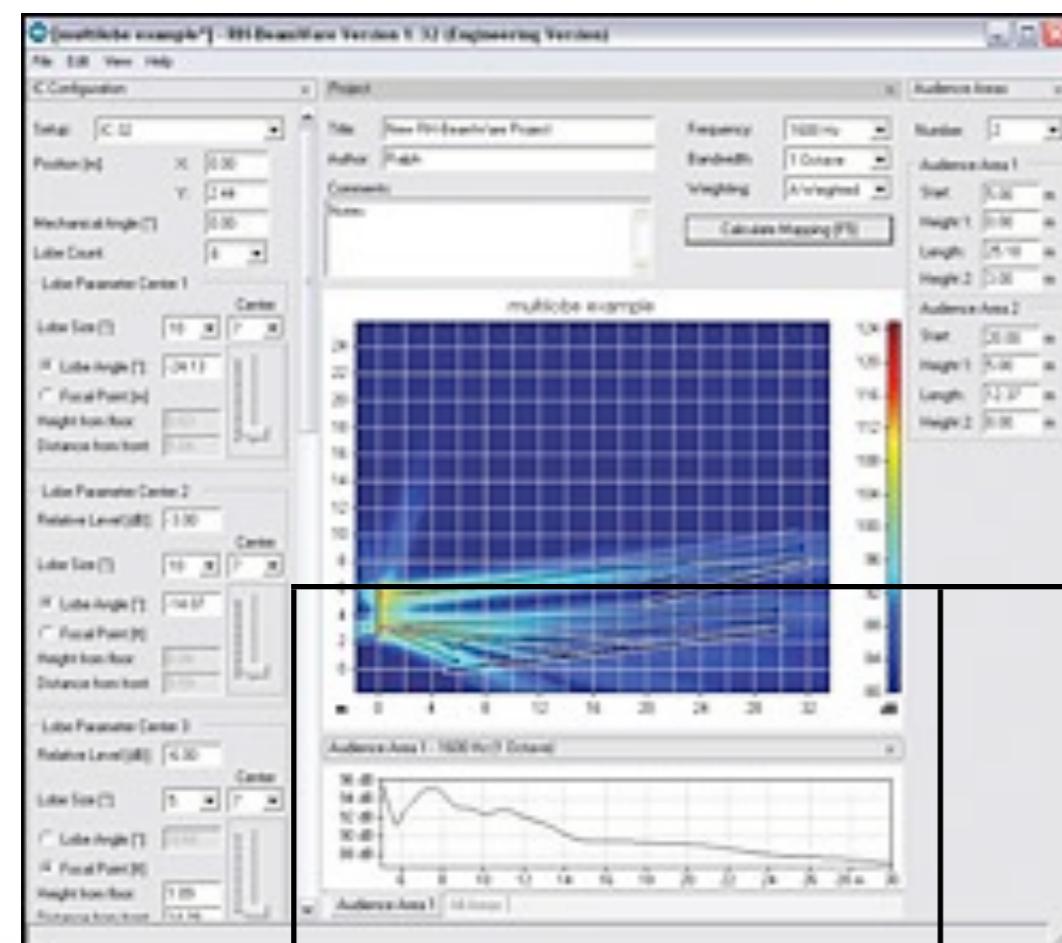

FIG. 2.5. A delay system for tilting the directional characteristic of a line of sound source

4 Beams (IC Live - Single)

Aiming Angle: -30° to +30°
 Vertical Dispersion: 20°, 25° and 30°
 Typical Throw: 66 Ft. (20 m)
