17h03, UTC+1, 7th August 2014, Fleurance, Gers, France.
The Earth as seen at an altitude at 38.3 km using a GoPro camera fixed the basket of a stratospheric balloon. The basket contained pressure, temperature radioactivity sensors and a GPS tracker. It was made by children between 8-12 years old during the Young Fleurance Astronomy Festival (France), of which ASTRON is a partner.
