

16h33, UTC+1, 13<sup>th</sup> August 2013, Fleurance, Gers, France.

This picture of the earth at 34.6 km altitude has been made by a GoPro camera fixed on a basket attached to a stratospheric balloon. The basket contained pressure, temperature, radioactivity sensors and a GPS tracker.

The basket has been made by children 8-12 years old during the young Fleurance astronomy festival.

In 2013, as in 2014, ASTRON is one of the partner of the young Fleurance astronomy festival.
