

LOFAR'S FIRST 100 PULSARS: Observations of 100 pulsars with LOFAR LBAs (40 MHz) and HBAs (140 MHz), WSRT (at P-band, 400 MHz) and the Lovell Telescope (at L-band, 1400 MHz). The evolution of the pulse profile with frequency help us explore the properties of the magnetosphere of the pulsar and of the medium between us and the pulsars.
