

Internationalisation

Introduction

LOFAR attracts a growing community that also would like to contribute to the LOFAR adventure. This is the general information page for the (potential) international partners of LOFAR.

At the moment, there are the following countries planning to add station to LOFAR or have them already funded:

- Germany - Four stations funded (Effelsberg, Garching, Potsdam, Tautenburg); One more planned (Juelich)
- UK - One station funded (place TBD); Three more planned
- France - One station funded (Nancay); Super station planned
- Sweden - One station funded (Onsala)
- Poland - Three station planned (Torun, Krakow, Jelena Gora)
- Austria/Ukraine - One station planned
- Italy - One station planned

On Google Maps that looks like (*green*: funded station, *yellow*: funded but no place found yet, *red*: planned station):

On the uv-plane this looks like:

General Information

A document has been drafted detailing the site requirements, the placement and the layout of a LOFAR station on an E-LOFAR site. This document tries to address a lot of questions that we are frequently asked.
