

Lofar stop-day (2-Okt-2018) review meeting

Date: 10-Okt-2018 at 11:30 in the Oort room

Present: Pietro, Henk, Reinoud, Adriaan, Jasmin, Teun

We used the activities list of the wiki as an [agenda](#):

- Cobalt - No remarks
- Cep3 - No remarks from operational side (see bellow for process improvement)
- Cep4 - No remarks from operational side (see bellow for process improvement)
- Lexars - No remarks from operational side (see bellow for process improvement)
- DWG Systems - No remarks from operational side (see bellow for process improvement)

Further remarks / Action Points

Adriaan

1. SDOS STOP-DAY checklist should be verified against Zabbix SDOS screens, missing checks if any should be added (Action for Adriaan & Richard)
2. Coordinator checklist should be adjusted/rearranged in more pragmatcal order, avoiding dependencies so that SDOS can proceed with checks more efficiently. (Action for Adriaan & ROadmin (Jasmin))
3. Provide JIVE/Opticon contacts to ROadmin group.(Action for Adriaan)

Henk/Pietro

1. Adjustment of the SOS check list should be considered, even splitting on SOS/Operator part (Action for SOS/OP)

ROadmin

1. Coordinator will take over the task "Block CEP3 Access" and add them on the check list
2. Coordinator will take care about reservations till the issue is not fixed and add this to checklist

([https://www.astron.nl/lofarwiki/doku.php?id=cep3:slurm_resv&s\[\]=reservations](https://www.astron.nl/lofarwiki/doku.php?id=cep3:slurm_resv&s[]=reservations))

1. Coordinator will send/share the link to new (see task above) to "Coordinator checklist"
2. Coordinator will stop/disable supervisord lexar003/004/scu001 on beginning of the STOP-Day and will enable it after SOS is

done with checks and this is communicated.

All

We should discuss and make plan about:

- external "sorry/maintenance" server (cloud, or internal solution)
- some of production/test system are not in sync :
