

# Stop-day activities June 6, 2017

|                                        |                  |                                                       |
|----------------------------------------|------------------|-------------------------------------------------------|
| <b>Coordinator</b>                     | Reinoud Bokhorst | rbokhorst@astron.nl<br>Skype: astron_reinoud.bokhorst |
| <b>Software Support</b>                | ??               | softwaresupport@astron.nl                             |
| <b>Science, Operations and Support</b> | ??               | sos@astron.nl                                         |
| <b>Observer</b>                        | ??               | observer@astron.nl                                    |

Planned end time: 15:00 LT (CET).

[schedule](#)

## Systems

- Put labels on Aartfaac machines (Teun/Kees)

### Cobalt

- reboots and idrac reboots
- `sed -i "s|-Lsd|-LS6d|" /etc/default/snmpd`

### CEP3

- All nodes: file system check and reboot

### CEP4

- Delete CEP3 data after stop day. Test data deletion simultaneously with a (test) observation to check the impact.

### LEXARS

- Reboot and repair Zabbix

### LCU

- Install postfix on scu001 and scu199

## Central Services

## Software updates

### MAC/SAS

- none

### CEP3

### CEP4

- none

### Aartaac

- none
