

User Software :: Test platforms

Debian GNU Linux 6.x

Most of the required external software packages can be installed via the package manager:

1. Packages essential for software development

```
apt-get install build-essential gfortran git-svn cmake subversion flex bison
```

2. Scientific libraries

```
apt-get install libcfitsio3-dev
```

Ubuntu Linux 10.04 LTS

```
apt-get install git-svn cmake
```
