

User Software :: Test platforms

Debian GNU Linux 6.x

Most of the required external software packages can be installed via the package manager:

1. Packages essential for software development

```
apt-get install build-essential gfortran git-svn cmake subversion flex  
bison  
apt-get install libblas-dev liblapack-dev libboost-all-dev
```

2. Scientific libraries

```
apt-get install libcfitsio3-dev
```

Ubuntu Linux 10.04 LTS

Most of the required external software packages can be installed via the package manager:

1. Packages essential for software development

```
apt-get install build-essential gfortran git-svn cmake subversion flex  
bison  
apt-get install libblas-dev liblapack-dev libboost-all-dev
```

2. Scientific libraries

```
apt-get install libcfitsio3-dev
```

OpenSuSE 11.x

Most of the required external software packages can be installed via the package manager:

- cmake
- git-svn
- subversion
- blas
- libblas3
- lapack
- liblapack3
