

International stations

LOFAR attracts a growing community that also would like to contribute to the LOFAR adventure. This is the general information page for the (potential) international partners of LOFAR.

General Information - Site Requirements

A document has been drafted detailing the site requirements, the placement and the layout of a LOFAR station on an E-LOFAR site. This document tries to address a lot of questions that we are frequently asked.

- [International Site Requirement Document](#) (living document, last update November 12, 2008)
- [International LOFAR station network description](#)
- [LOFAR Container specification](#)

If you have more questions, you would like to visit us or you would like us to visit you, please contact Corina Vogt (vogt<at>astron.nl)

International partners

At the moment, there are the following countries planning to add station to LOFAR or have them already funded:

- Germany - Four stations funded (Effelsberg, Garching, Potsdam, Tautenburg); One more planned (Juelich)
- UK - One station funded (Chilbolton); Three more planned
- France - One station funded (Nancay); Super station planned
- Sweden - One station funded (Onsala)
- Poland - Three station planned (Torun, Krakow, Jelena Gora)
- Austria/Ukraine - One station planned
- Italy - One station planned

On Google Maps that looks like (*green*: funded station, *yellow*: funded but no place found yet, *red*: planned station):

On the uv-plane this looks like:
