The final LOFAR configuration

On this page the final LOFAR configuration will appear as it is decided and the land is secured. In the end of last year the decisions have been made for the core station layout. At the moment, the LOFAR NL configuration including baselines of up to 100km is investigated. The E-LOFAR configuration is changing as new partners join and more LOFAR sites become available (for more information on E-LOFAR go here).

The LOFAR core

The LOFAR core area is located in Exloo (NL).
