

Advanced ways to find and retrieve data in the LTA

There are some useful ways to find and retrieve your data in the LTA that might not be immediately obvious. This page explains some of the more advanced options you have.

Queries

- You can use wildcards in your query. This will for example give all observations and pipelines that have a SAS/Observation ID in the 146xxx range:

Target Name	3<19*
-------------	-------

- You can put a list of SAS/Observation IDs in the query:

Observation Id	146112,147775,151778		
Observing Date	From	0000-00-00 00:00:00	
	To	0000-00-00 00:00:00	

Retrieving data

- You can retrieve data on the Observation and Pipeline level, you don't have to select all files individually.

- If you have a query with more than 1000 results, you can open the multiple pages each in a separate tab/window.
