

## A report from the 2nd LOFAR data school

John McKean (ASTRON)

on behalf of the LOC (M. Wise et al.)

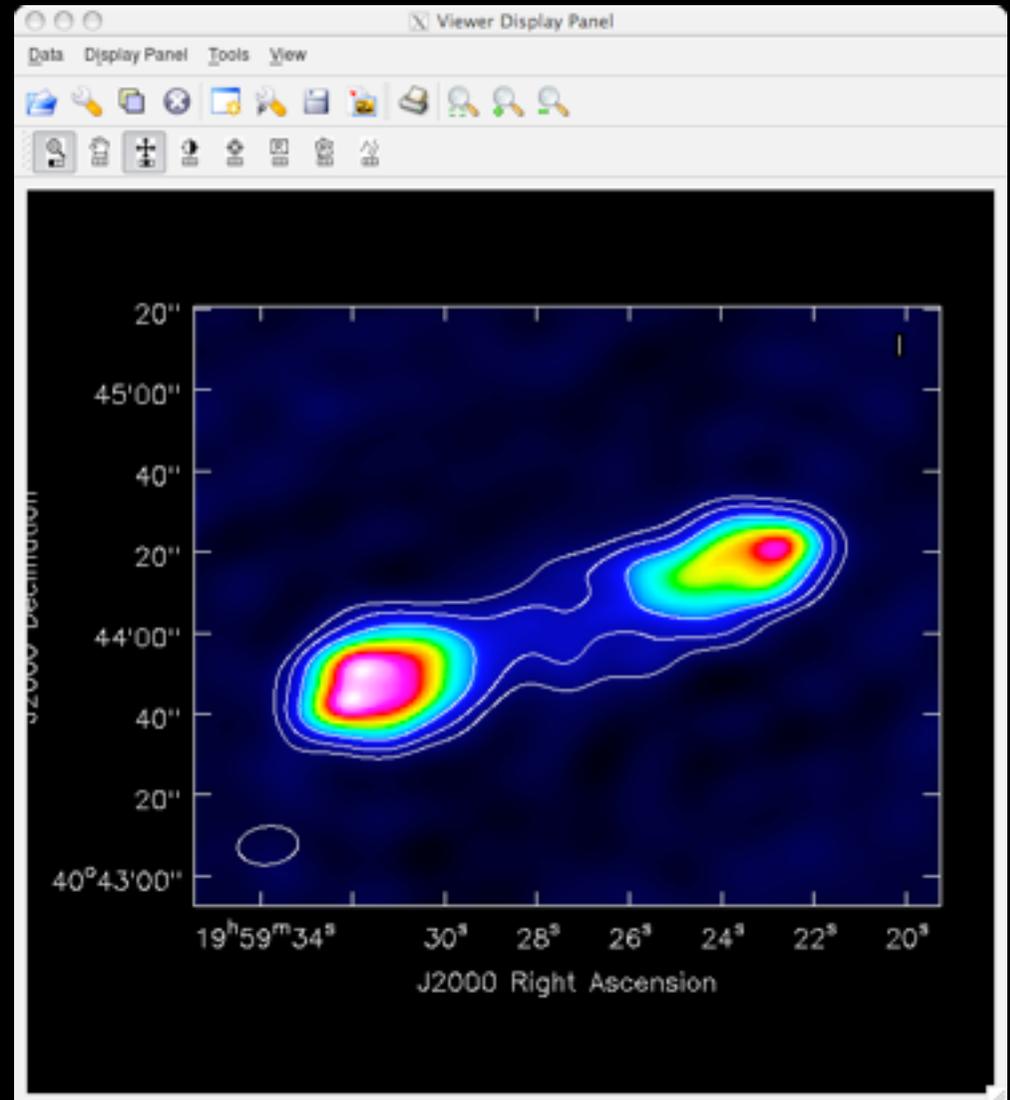

# The 2nd LOFAR data school

- The 2nd LOFAR Data School took place at ASTRON on October 11-15.
- There were 40+ participants (all new LOFAR team members)

	Monday, October 11	Tuesday, October 12	Wednesday, October 13	Thursday, October 14	Friday, October 15
9:30 AM	Welcome (Wise)	ASTRON	Polarization (Haverkorn)	Dynamic Spectra with LOFAR (Griessmeier)	Particle Physics with LOFAR (James)
10:00 AM	Intro. to Low Frequency Radio Astronomy (Heald)	Plenary Session	Q&A	Q&A	Q&A
10:30 AM	Coffee Break		Coffee Break	Coffee Break	Coffee Break
11:00 AM	LOFAR Overview (Wise)	Correlator and Online Processing (Romein)	Ionospheric Effects (van Bommel)	VLBI with LOFAR (Anderson)	High Time Resolution with LOFAR (Hessels)
11:30 AM	Q&A	Q&A	Q&A	Q&A	Q&A
12:00 PM	LOFAR Station Processing (Norden)	Introduction to Calibration (de Bruyn)	Wide-field Imaging (Nijboer)	Observing with LOFAR (Polatidis)	Observing Pulsars with LOFAR (Alexov)
12:30 PM	Q&A	Q&A	Q&A	Q&A	School Concludes (Wise)
1:00 PM	Lunch	Lunch	Lunch	Lunch	Lunch
1:30 PM					
2:00 PM	RFI and Compression (Rafferty)	Calibrating LOFAR Data (BBS - van Zwieten) (CASA - TBD)	Hands-on Exercises	Intro. to Hands-on Sessions (McKean)	
2:30 PM	Q&A	Q&A	End of Day	Hands-on Exercises	
3:00 PM	Intro. to Hands-on Sessions (McKean)	Intro. to Hands-on Sessions (McKean)		End of Day	Hands-on Exercises
3:30 PM			Excursion to LOFAR Core (Norden)	ASTRON Colloquium	
4:00 PM	Hands-on Exercises	Hands-on Exercises		Philippe Zarka "Planetary Science with LOFAR and more"	
4:30 PM				+	
5:00 PM	End of Day	End of Day			End of Day
5:30 PM	Borrel			Colloquium Borrel	
6:00 PM					
6:30 PM			Workshop Dinner		
7:00 PM					
7:30 PM					
8:00 PM					

- 1.5--3 hours in the afternoons for hands on sessions.  
The aim of these sessions was to introduce the students to LOFAR data, and the data analysis packages - take the fear out!
- Run NDPPP (and RFIconsole) to flag and compress a dataset.
- Make an HBA image of Cygnus A in CASA.
- RM synthesis in action.
- Ionosphere modeling.
- Calibrate Cygnus A data in BBS (and image in CASA).
- These exercises will form the basis for tutorials that are being added to the imaging cookbook.

- The students worked together in 2s and 3s.
- All groups made an image of Cygnus A.
- The BBS tutorial was carried out on the Friday afternoon, so not all of the attendees took part in this exercise.

- The school was very successful, introducing a new class of commissioners to LOFAR and LOFAR data (more successful busy weeks in the future?).
- An excellent group that interacted well with each other and with the lecturers and tutors.
- Students wished that the school was longer (2 weeks) and that there was more time for the hands-on exercises.
- Congratulations and Well Done to the LOC (Wise et al.), RO staff, Secretaries, the Lecturers (near and far) and the Tutors that helped make the week a success.

JUST DON'T MENTION THE 3RD DATA SCHOOL, YET.
