ASTRON

Netherlands Institute for Radio Astronomy

LTA status

Adriaan Renting
Lofar Status Meeting

29 May 2013

May results

ASTRON

Data transferred to the LTA: ~250 TB + ~150 TB EoR
Data staged/retrieved from the LTA: 20 TB + EoR
Uptime: Problems with tape systems Target and minor issues in Jülich.
Metadata issues in MoM and OTDB.
New developer Stefan Fröhlich (Jülich/Bochum) for processing at LTA.

May LTA work and June plans

ASTRON

Ongoing:
- More speed improvements in moving data to the LTA.
- More robustness in handling metadata.

Implemented:
- Easier user interface for selecting large amounts of data to be staged/retrieved.

Planned:
- Query improvements.
- GridFTP service Target/RuG
