

LTA status

Hanno Holties
Lofar Status Meeting

7 January 2015

January uptime

27 November 2014 – 6 January 2015

No results report: Monitoring (Zabbix) down over Xmas period

- No technical issues with ingest & staging reported

Big interruptions (several days to weeks): None

Smaller issues (single day)

- 27-28 November: Target service nodes down for ~20 hours
 - Cause: unexpected issue during RUG network maintenance.
 - LTA Website (AstroWise) & Ingest affected
- 17 December: Transfers to EOR interrupted
 - Cause: network configuration mismatch EOR/Target following planned maintenance

Work and plans

- Public availability of data in the LTA
- Switch Target – SARA SURFnet connection (half January)
 - Phasing out of SURFnet 6
 - High bandwidth TARGET – Public internet (TARGET LTA)
 - Currently only usable for transfers EOR cluster – SARA LTA
