

# CS1 Status

CS-08

CS-10

CS-01 CS-16

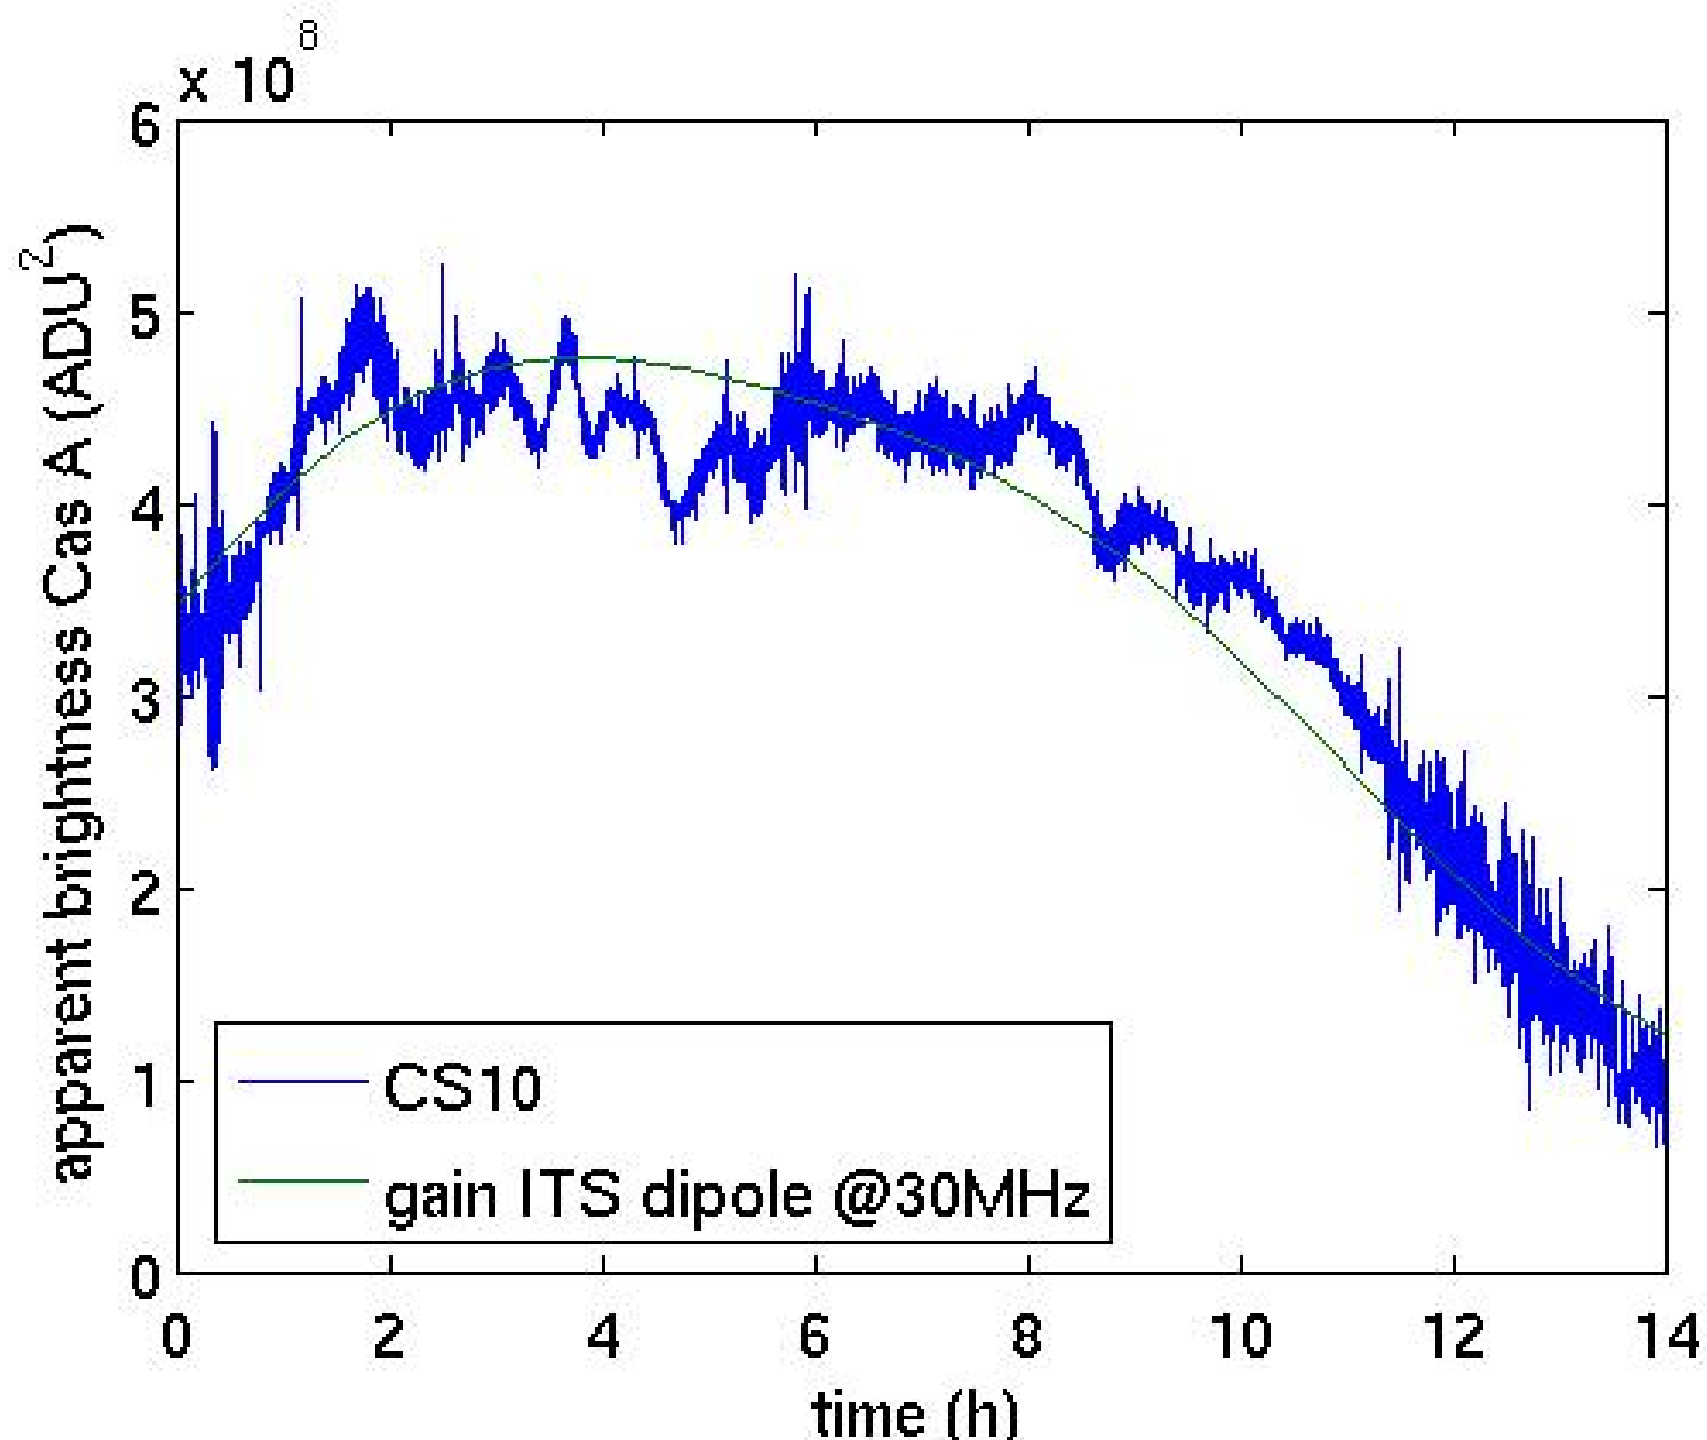

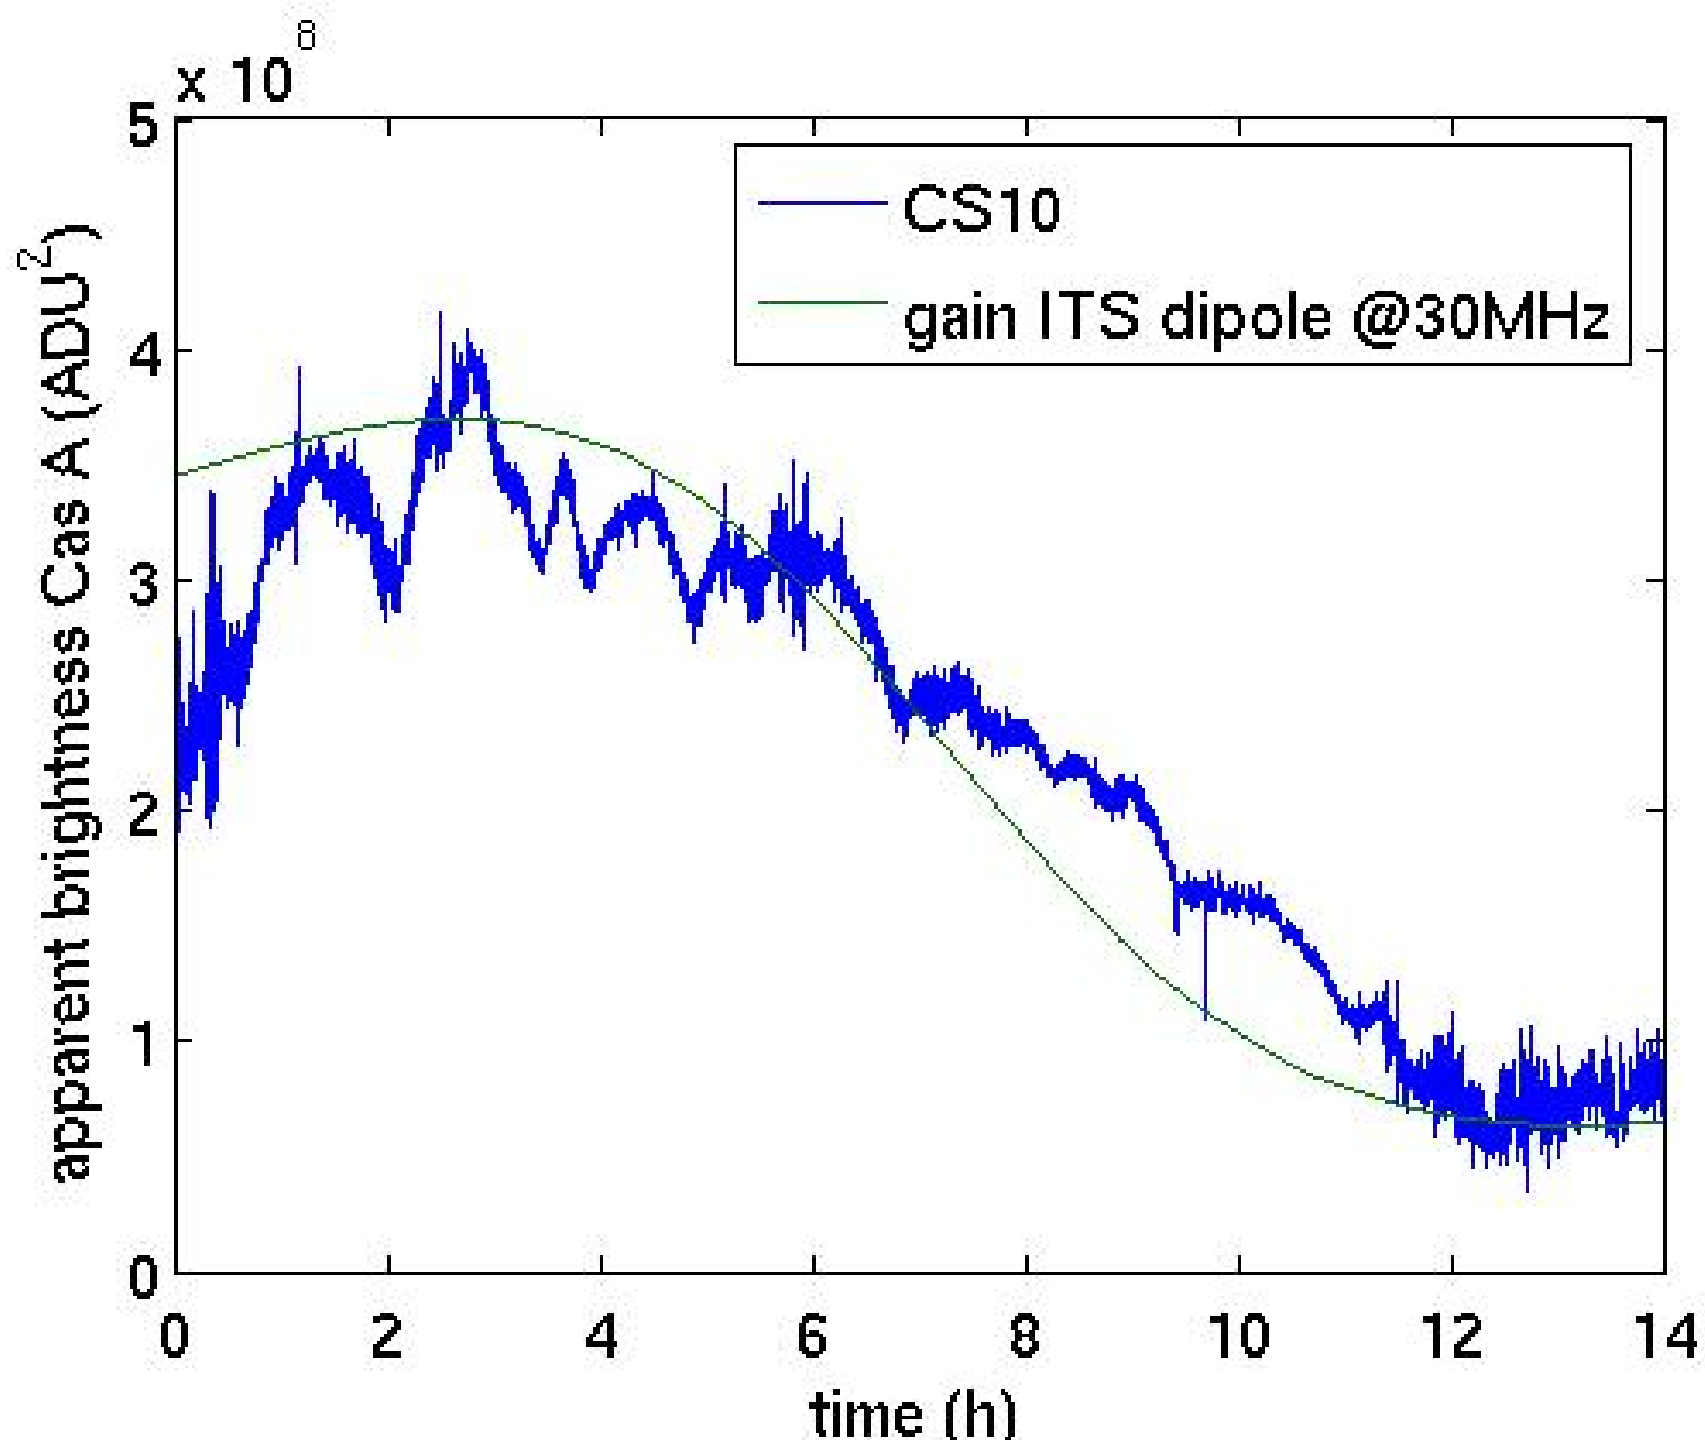

# CS-all

---

- ◆ 1600 Mbps output (80% of goal)
- ◆ Issue: Timestamps not ok solved (new firmware downloaded to all stations)
- ◆ Beamtracking: verified (qualitative)
- ◆ Latest LCU 6.1 version operational on all stations
- ◆

# Experiments

---

- ◆ Last week pulsar observations with static beamforming @ 160MHz and 200MHz clock: failed
- ◆ Last weekend: measurement set of 16 uStations created
- ◆ Yesterday pulsar 0329+54 tracked @ 160 MHz

# Transient Buffer Board
