

Programme

- 1) Array status – Harm Munk
- 2) Observatory update – Wilfred Frieswijk
- 3) LTA update - Hanno Holties
- 4) Status update on LOTAAS and millisecond pulsars observations
- Jason Hessels
- 5) Observations in HBA DUAL INNER configuration: pro and cons
- Ger de Bruyn
- 6) Update on RRL results - Raymond Oonk

Array Status

Current Status:

- 36 operational NL stations
- 24 CSs
- 13 RSs
- 8 ISs
- RS210: network connection expected by April 8
- FR606:
 - airco repaired
 - TBB upgrade installed
- DE602: Broken airco (Feb 22), repaired TBB board 7 broken.

www.astron.nl/radio-observatory/astronomers/current-status

Network, CEP Status

Network

- Still unresolved network problems on the Jülich-Groningen link

BG/P

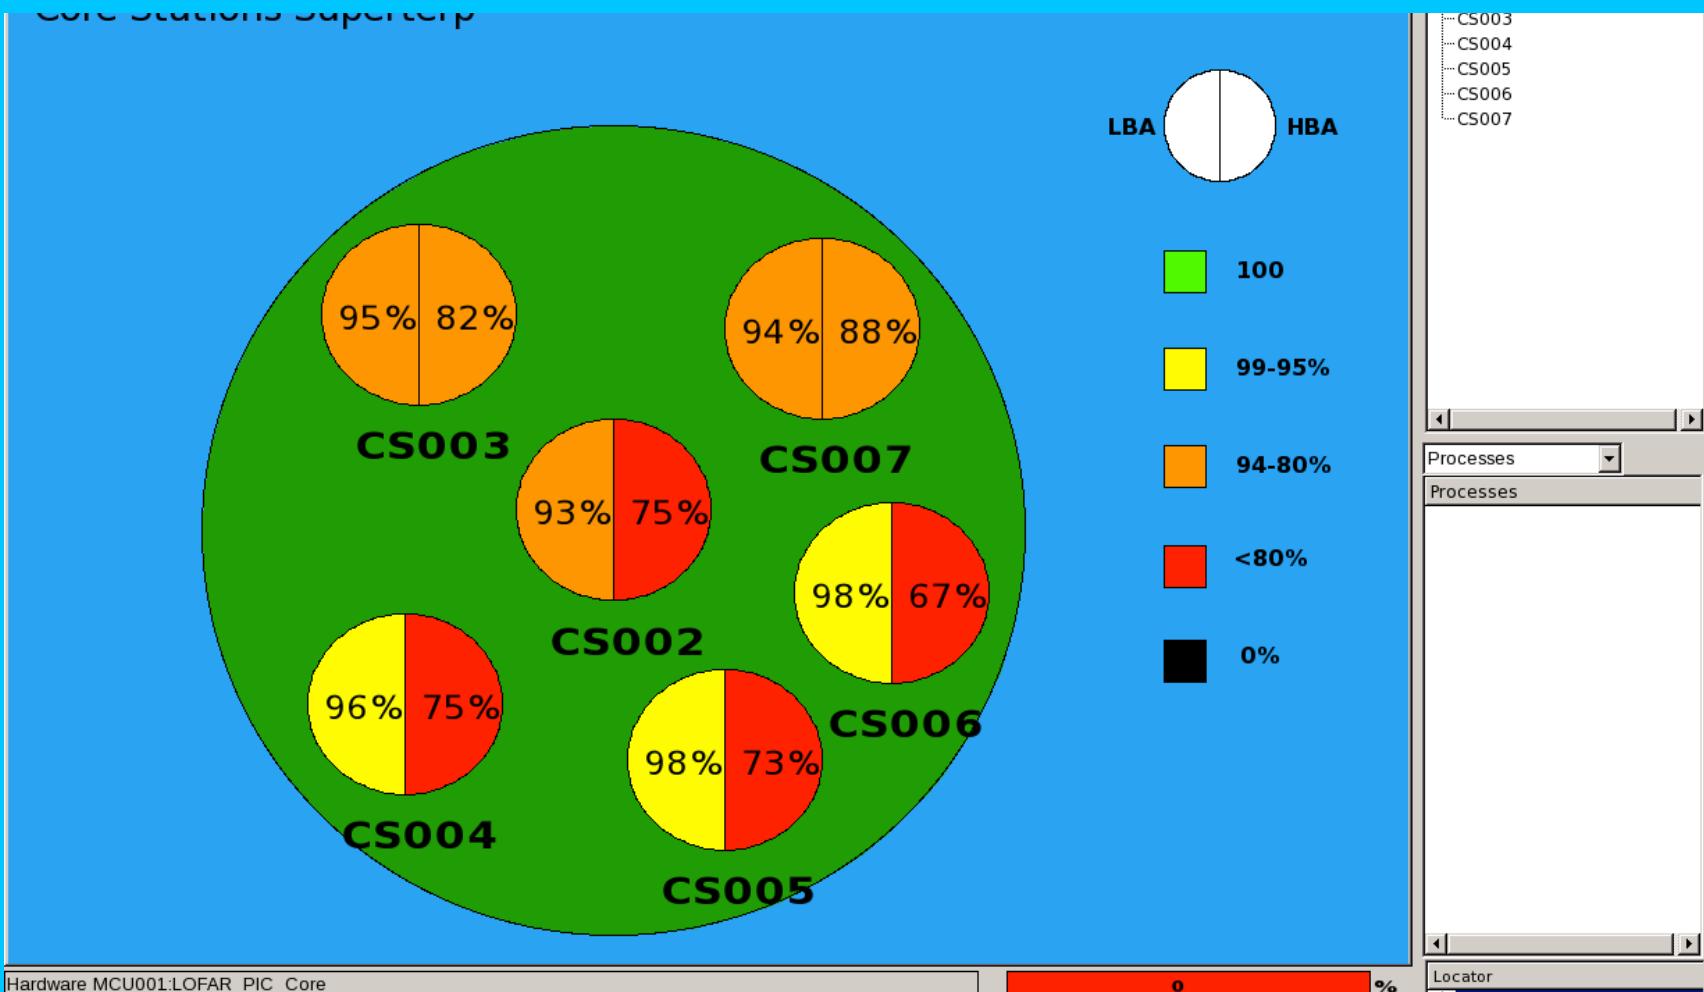

- Performance nominal

CEP-I/II

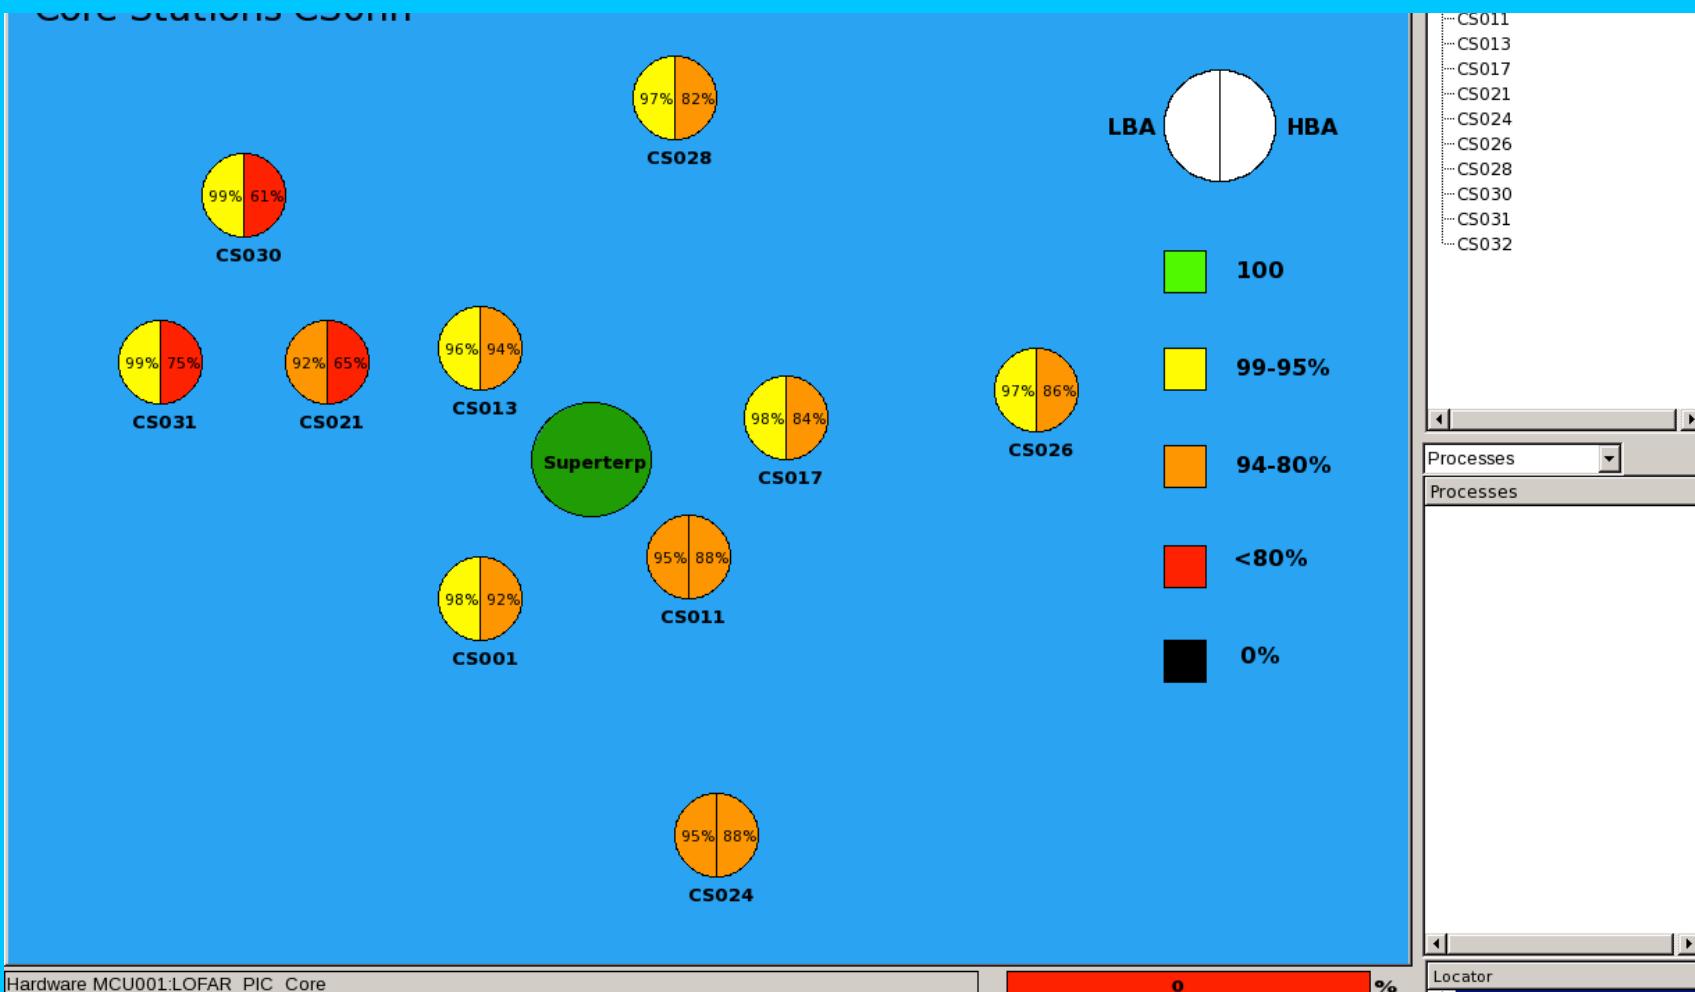

- No issues during stop day

Next stop day: Tuesday, April 9

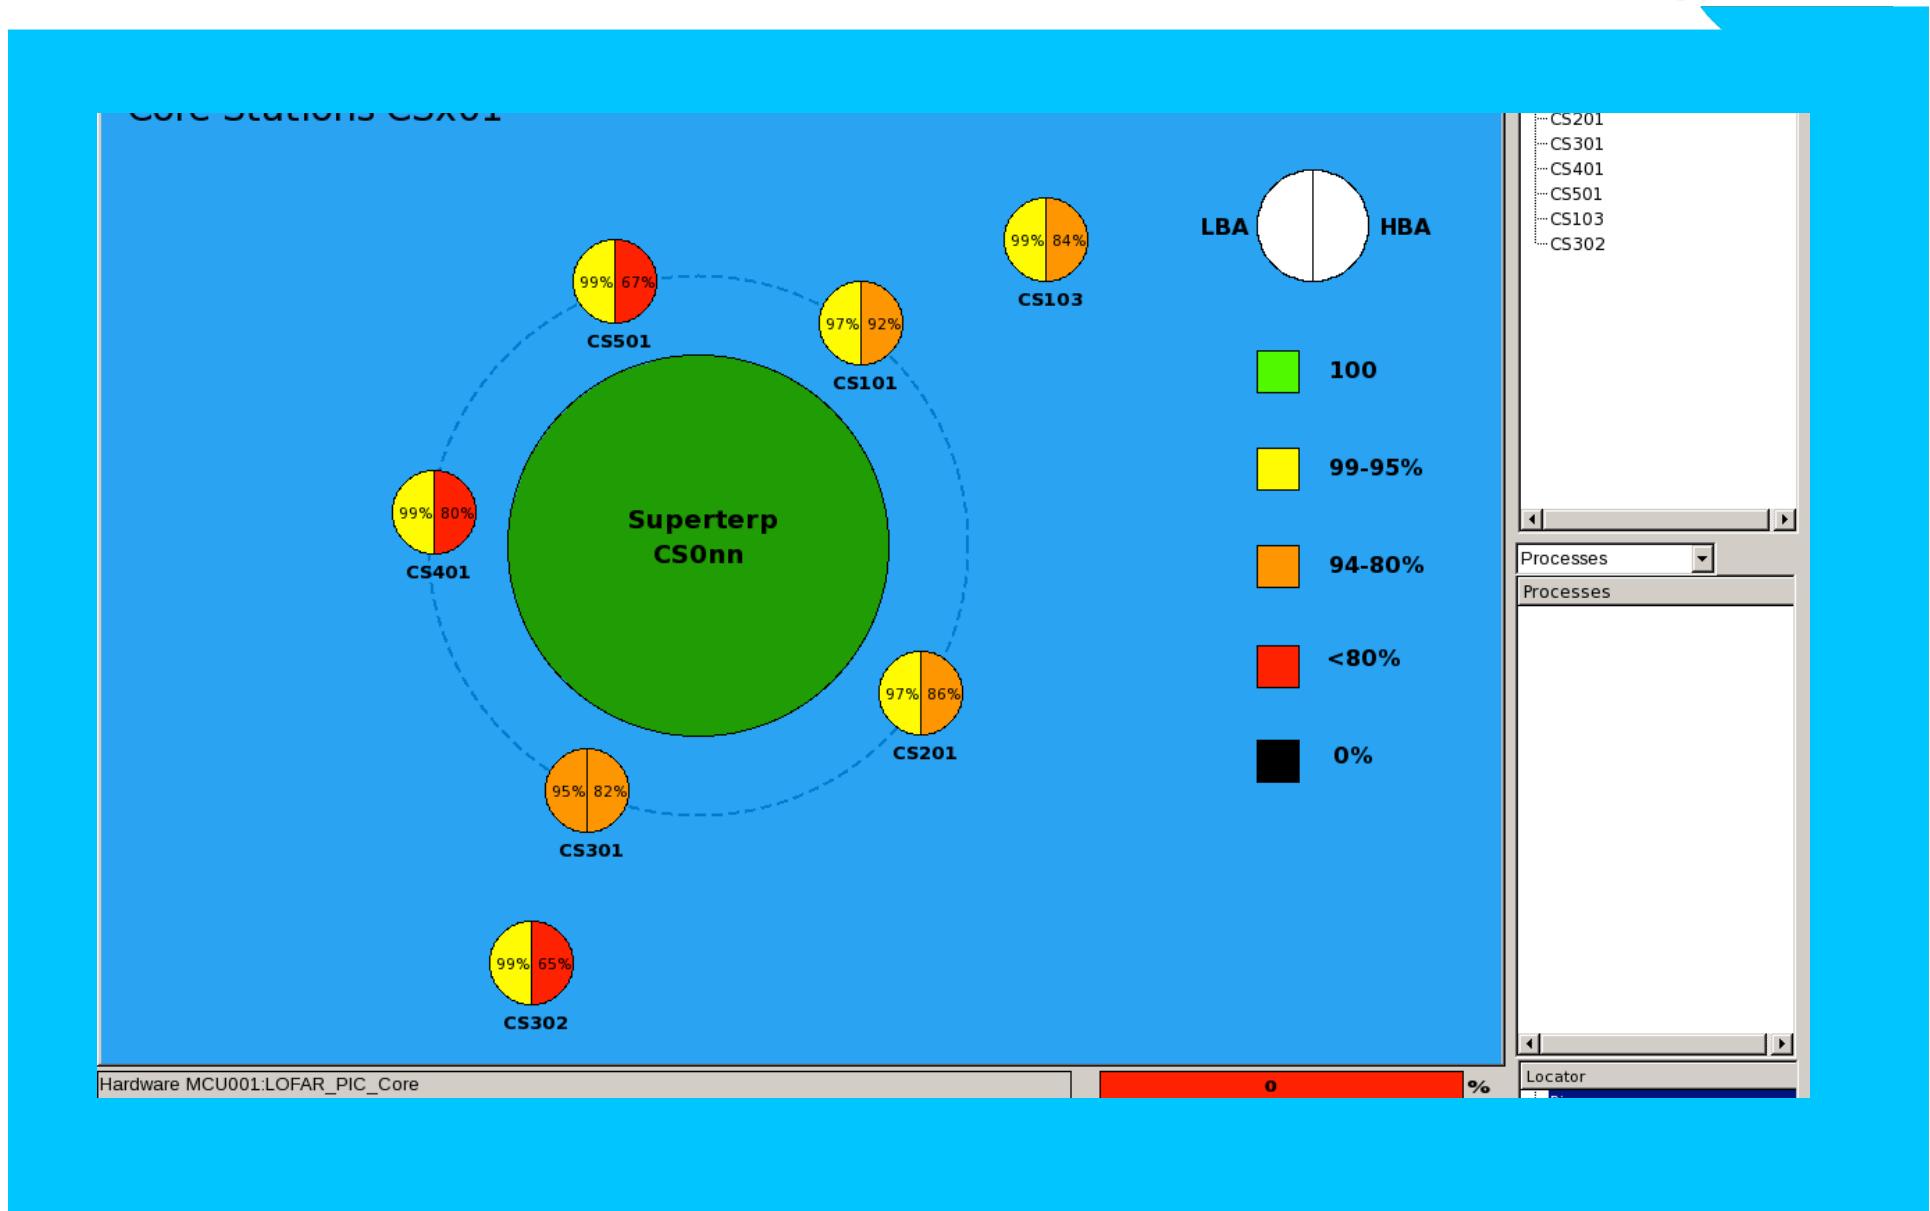

Superterp

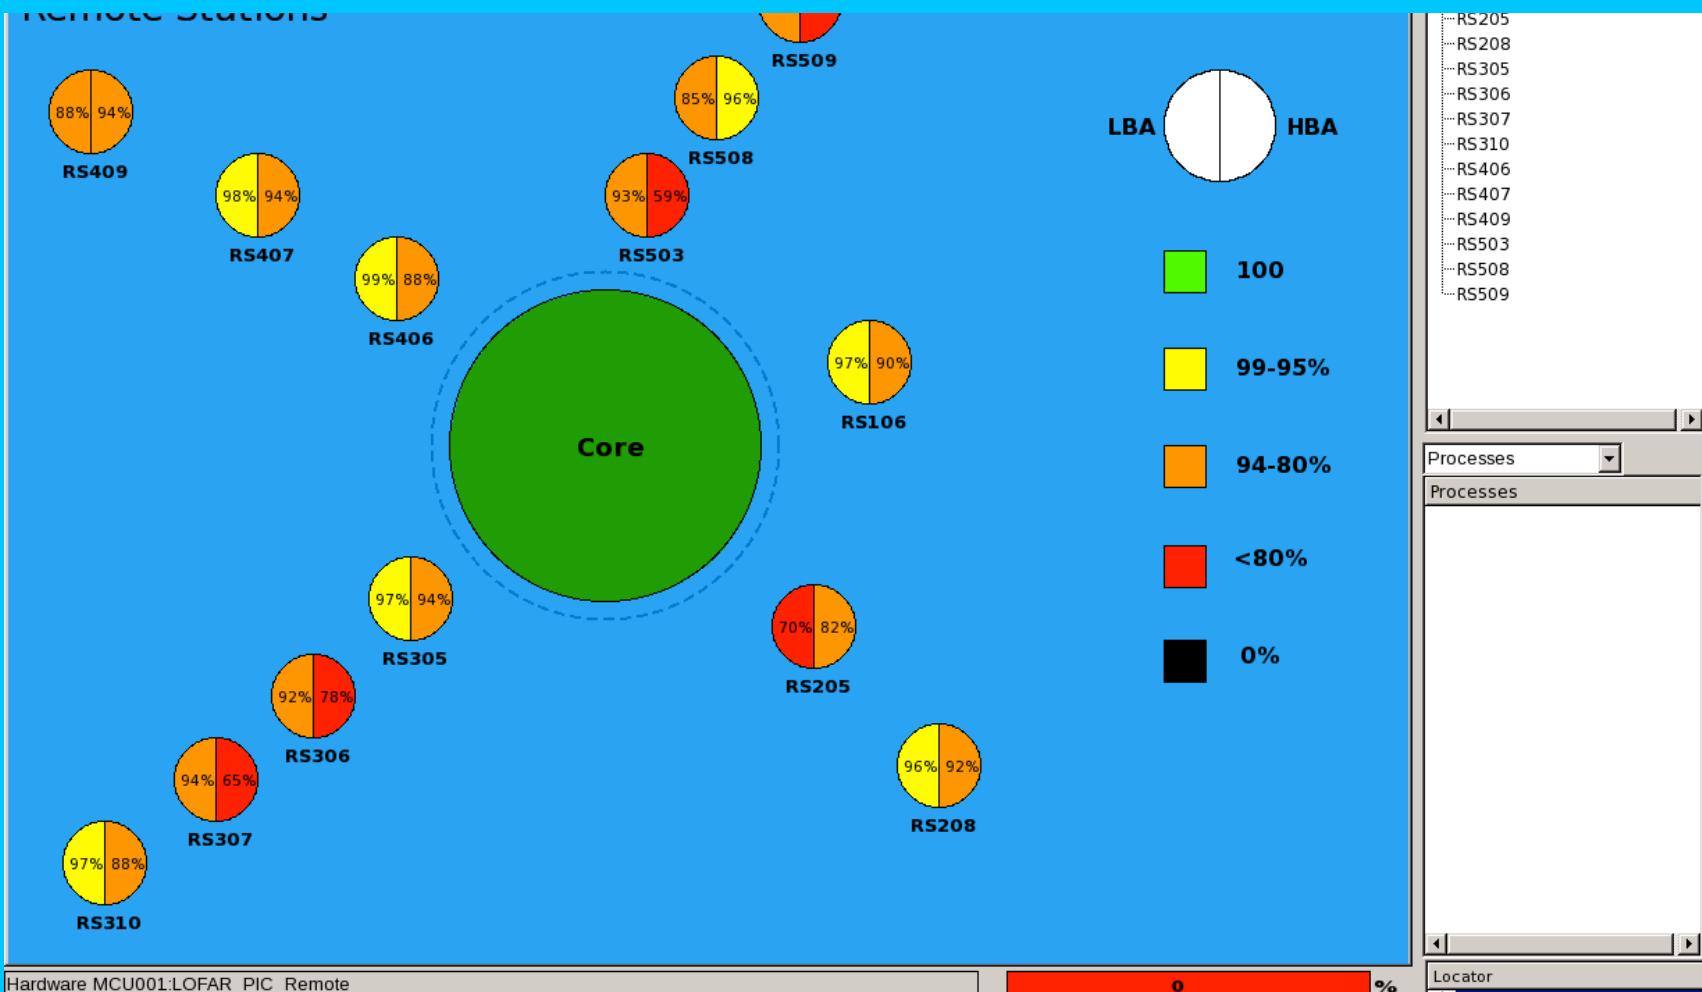

Core

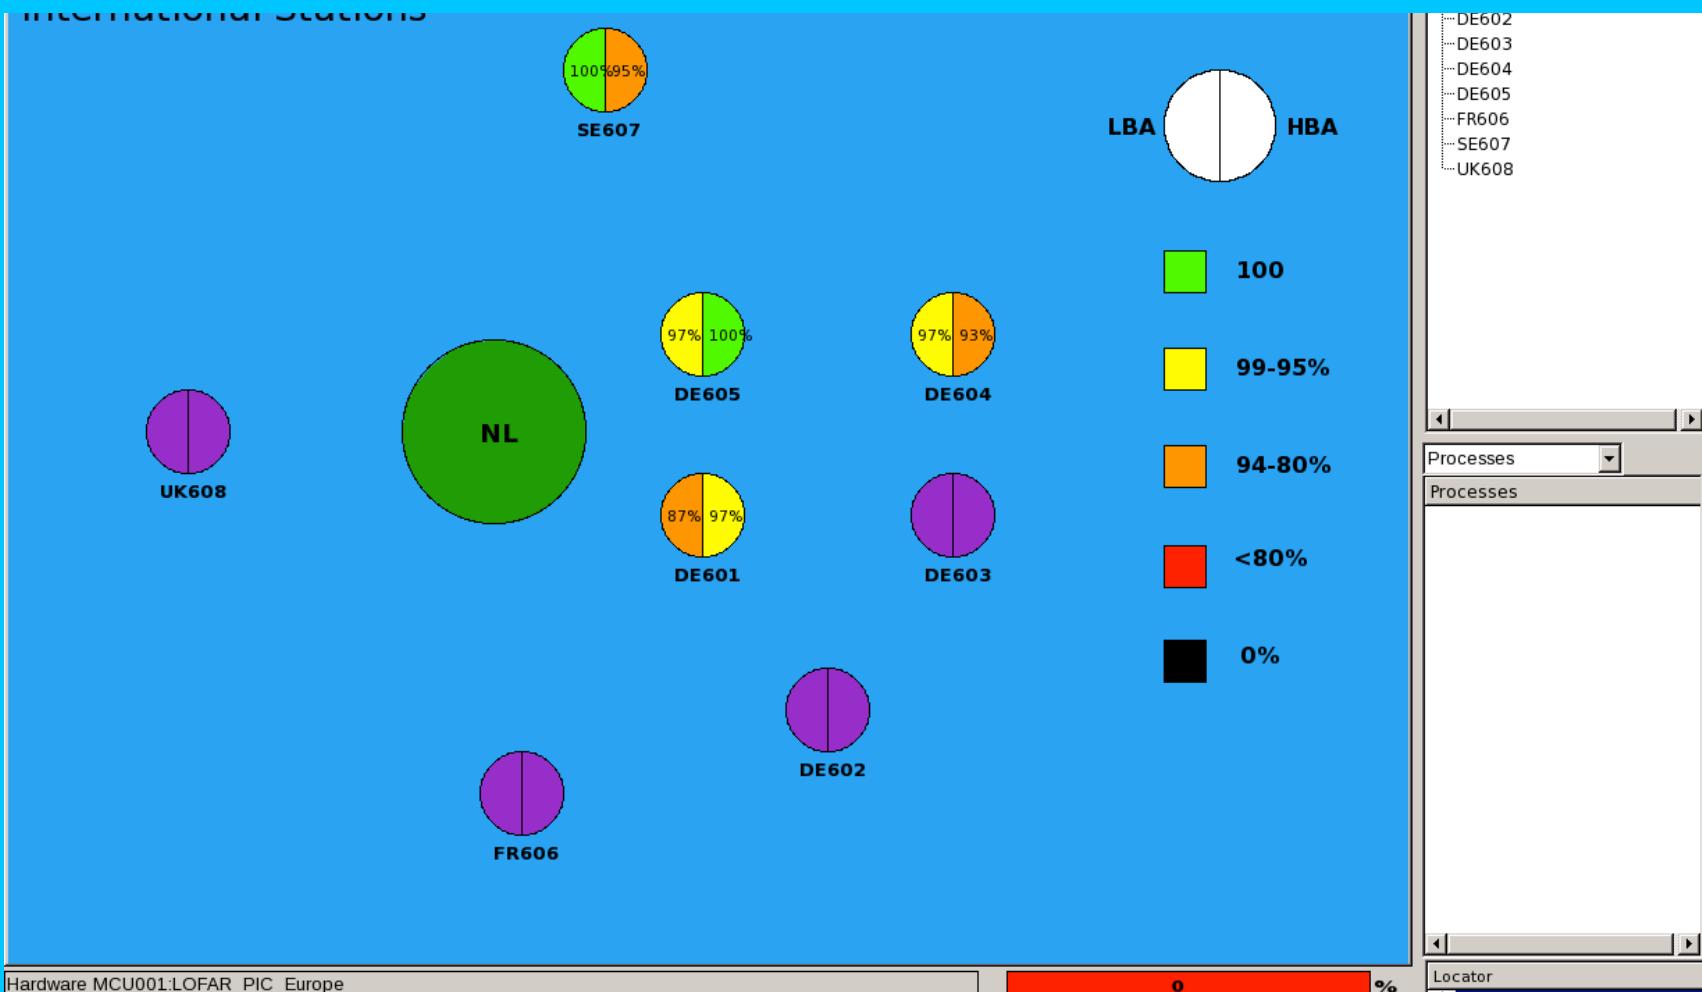

Core x01 and outside

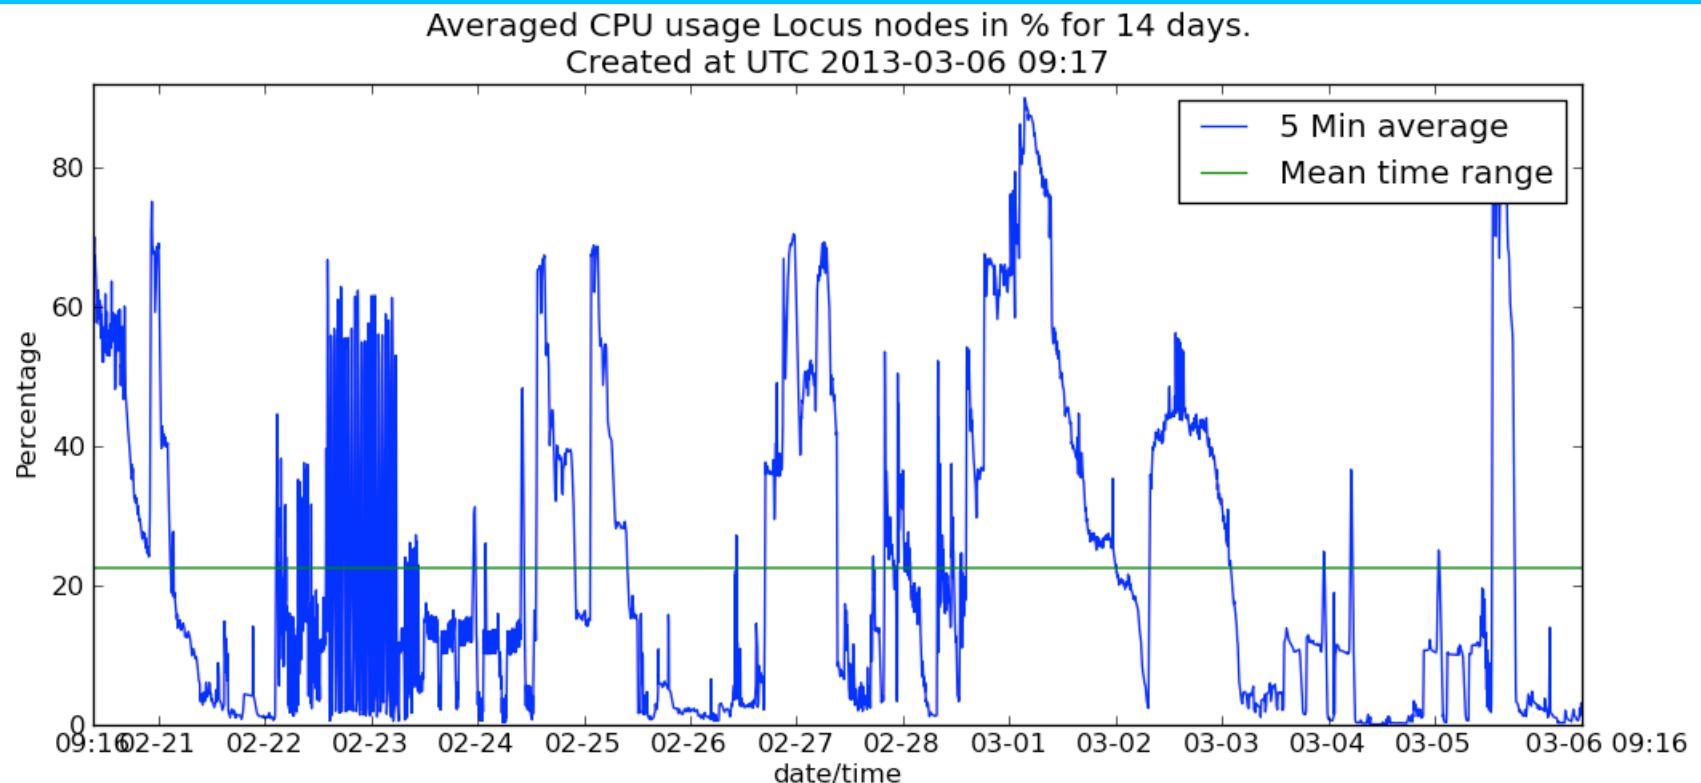

Remote

International

CEP usage last two weeks

News regarding the observing system

- Overall system stability is good
 - ✓ Observations stable
 - ✓ Pipelines getting more stable
 - swapping when too many are running
 - specification errors
- TBB's broken (DE602)
- Oscillating tiles: CS026
- Station tests (HBA)
 - ✓ new station-test allows for easier detection
 - * but may flag too robust or miss sparsely intermittent
 - * flagging on element level

News regarding the observing system: Updates, issues, tests

- Development
 - ✓ focus: bug fixes, preparation/scheduling-efficiency improvement
 - ✓ current sprint extended, next rollout March 26
 - ✓ XML generator for preparation of cycle 0 runs
 - Ongoing tests: automatically generated pipelines (v8)
- Updates of MoM, Scheduler and SaS/MAC to improve functionality and stabilize the system
 - ✓ SAS003: scheduling faster
 - ✓ ingest and observations on separate systems

News regarding the observing system: Tests, MSSS, other

- Station tests, monitoring etc... continue
- Continuation MSSS HBA survey
 - ✓ 1 new 8hr blocks
 - * on hold currently due to archiving issues
- VHECR stand-alone
- Commissioning
 - ✓ Cyg A HBA low (J. McKean)

News regarding the observing system: Archive

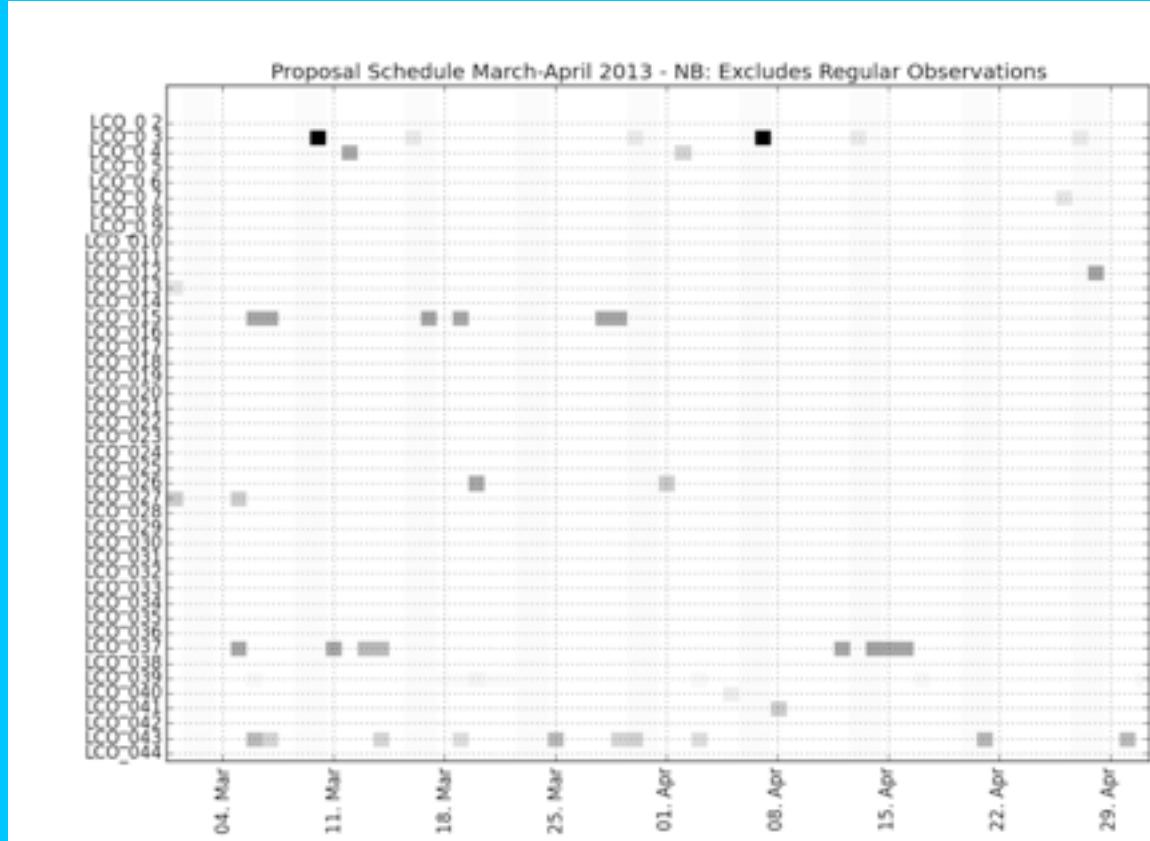

- BF LTA ingest top-item for current development sprint
- Raw/processed data ingest to LTA (LC0) is ongoing
 - * Hanno Holties
- LC019 data transferred to Target cluster
- Processed LC0 data transferred to CEP1 for expert processing (maximum of 4 weeks)

News regarding Cycle 0 observations

<https://www.astron.nl/radio-observatory/lofar/cycle-0-schedule/cycle-0-schedule>

- Cycle 0 continuing at >30% efficiency
 - * limited by data flow
- Projects (including test observations):
 - LC0_002, LC0_003, LC0_006, LC0_007, LC0_009, LC0_011, LC0_012, LC0_013, LC0_015, LC0_017, LC0_019, LC0_026, LC0_032, LC0_034, LC0_037, LC0_038, LC0_039, LC0_041, LC0_042, LC0_043
- Local use Int-stations:
 - LC0_010, LC0_014, LC0_044

- Stop-day: OK
 - * SAS003 database overwritten --> 1 day recovery
- CEP1 & 2 are stable
 - * some nodes lost a disk, RAID rebuild takes a ~week
(locus008,022,030,041)
- Next stop-day: April 9 (Tuesday)

CALENDAR of requested busy weeks and other LOFAR activities

- Commissioning
 - ✓ [http://www.astron.nl/radio-observatory/astronomers/
commissioning/commisioning-plan](http://www.astron.nl/radio-observatory/astronomers/commissioning/commisioning-plan)
- Cycle 0
 - ✓ <http://www.lofar.org/wiki/doku.php?id=operator:schedule>

13 Mar Busy Wednesday

18-22 Mar LOFAR Dalfsen 2

13-16 May MKSP (13-15 workshop + 16-17 busy days)

9 Apr CEP stop-day
